The Restless Clock Jessica Riskin, 2016-03-10 A core principle of modern science holds that a scientific explanation must not attribute will or agency to natural phenomena. *The Restless Clock* examines the origins and history of this, in particular as it applies to the science of living things. This is also the story of a tradition of radicals--dissenters who embraced the opposite view, that agency is an essential and ineradicable part of nature. Beginning with the church and courtly automata of early modern Europe, Jessica Riskin guides us through our thinking about the extent to which animals might be understood as mere machines. We encounter fantastic robots and cyborgs as well as a cast of scientific and philosophical luminaries, including Descartes and Leibnitz, Lamarck and Darwin, whose ideas gain new relevance in Riskin's hands. The book ends with a riveting discussion of how the dialectic continues in genetics, epigenetics, and evolutionary biology, where work continues to naturalize different forms of agency. *The Restless Clock* reveals the deeply buried roots of current debates in artificial intelligence, cognitive science, and evolutionary biology.

Ticktock Banneker's Clock Shana Keller, 2016-09-01 Throughout his life, Benjamin Banneker was known and admired for his work in science, mathematics, and astronomy, just to name a few pursuits. But even when he was born in Maryland in 1731, he was already an extraordinary person for that time period. He was born free at a time in America when most African

Americans were slaves. Though he only briefly attended school and was largely self-taught, at a young age Benjamin displayed a keen aptitude for mathematics and science. Inspired by a pocket watch he had seen, at the age of 22 he built a strike clock based on his own drawings and using a pocket-knife. This picture book biography focuses on one episode in a remarkable life.

Designing and Building a Grandfather Clock Gary Williams,1980-01-01 Woodworker's manual demonstrates the building of a grandfather clock, from workshop preparation to purchase of the mechanisms and interior pieces to the design and joinery of the finished product

I'm Sorry about the Clock Thomas A. Pendleton,1993 Pendleton, that virtually none of these temporal incoherences seem to have been noted before. Moreover, this study departs from the critical consensus that the earlier drafts of the novel are evidence of Fitzgerald's consummate artistry. Among the discoveries presented here are that Fitzgerald made no use of the 1922 calendar; that he did not work out the novel's time scheme until after completing about half of the manuscript version (possibly because he intended *Gatsby* to be much longer); and that, quite probably, he attempted to disguise at least some of the book's temporal misplacements and contradictions. Further, this study shows that even the most praised of Fitzgerald's revisions - his relocation of materials dealing with *Gatsby's* past so as to gradually reveal his secret - was apparently without exception accompanied by faulty temporal connections to the plot line.

Worked Over Jamie K McCallum,2020-09-08 An award-winning sociologist reveals the unexpected link between overwork and inequality. Most Americans work too long and too hard, while others lack consistency in their hours and schedules. Work hours declined for a century through hard-fought labor-movement victories, but they've increased significantly since the seventies. *Worked Over* traces the varied reasons why our lives became tethered to a new rhythm of work, and describes how we might gain a greater say over our labor time -- and build a more just society in the process. Popular discussions typically focus on overworked professionals. But as Jamie K. McCallum demonstrates, from Amazon warehouses to Rust Belt factories to California's gig economy, it's the hours of low-wage workers that are the most volatile and precarious -- and the most subject to crises. What's needed is not individual solutions but collective struggle, and throughout *Worked Over* McCallum recounts the inspiring stories of those battling today's capitalism to win back control of their time.

168 Hours Laura Vanderkam,2011-05-31 It's an unquestioned truth of modern life: we are starved for time. We tell ourselves we'd like to read more, get to the gym regularly, try new hobbies, and accomplish all kinds of goals. But then we give up because there just aren't enough hours to do it all. Or if we don't make excuses, we make sacrifices- taking time out from other things in order to fit it all in. There has to be a better way...and Laura Vanderkam has found one. After interviewing dozens of successful, happy people, she realized that they allocate their time differently than most of us. Instead

of letting the daily grind crowd out the important stuff, they start by making sure there's time for the important stuff. When plans go wrong and they run out of time, only their lesser priorities suffer. Vanderkam shows that with a little examination and prioritizing, you'll find it is possible to sleep eight hours a night, exercise five days a week, take piano lessons, and write a novel without giving up quality time for work, family, and other things that really matter.

and carry on.” That’s what Katherine Bateson’s father told her, and that’s what she’s trying to do: when her father goes off to the war, when her mother sends Kat and her brother and sister away from London to escape the incessant bombing, even when the children arrive at Rookskill Castle, an ancient, crumbling manor on the misty Scottish highlands. But it’s hard to keep calm in the strange castle that seems haunted by ghosts or worse. What’s making those terrifying screeches and groans at night? Why do the castle’s walls seem to have a mind of their own? And why do people seem to mysteriously appear and disappear? Kat believes she knows the answer: Lady Eleanor, who rules Rookskill Castle, is harboring a Nazi spy. But when her classmates begin to vanish, one by one, Kat must uncover the truth about what the castle actually harbors—and who Lady Eleanor really is—before it's too late.
