Cracking the Timeline Ruth Rosemary,2023-03-10 History versus science, history versus history, or history with science--who has it right? In this book, you will be challenged to think differently about BC history. Discover a calendar that is over five thousand years old and how the younger calendars go with it in this timeline. Discover a reason why different dates are assigned to the same event. Explore why the Second Temple of Judaism which stood partly BC and partly AD for about 420 years can have a start date in the 500s BC and 300s BC. Discover concurrent event reading of the Bible as it relates to history. Discover the accuracy preserved by forefathers and more. With the use of the Gregorian calendar

beginning in the 1500s, we read BC history with dates that go backward as events move forward. This is exactly the opposite of our current dates where the dates move forward as events move forward. In this book there is a BC to AD timeline of the Bible, some history and some prophesied events. As you read, you will go on a journey through history, and put together past and present through what was written down about events and prophesied events. 157

Transparent data mining solutions with desirable properties (e.g. effective, fully automatic, scalable) are covered in the book. Experimental findings of transparent solutions are tailored to different domain experts, and experimental metrics for evaluating algorithmic transparency are presented. The book also discusses societal effects of black box vs. transparent approaches to data mining, as well as real-world use cases for these approaches. As algorithms increasingly support different aspects of modern life, a greater level of transparency is sorely needed, not least because discrimination and biases have to be avoided. With contributions from domain experts, this book provides an overview of an emerging area of data mining that has profound societal consequences, and provides the technical background to for readers to contribute to the field or to put existing approaches to practical use.
